LEBANO

* Generally a state's **Exclusive Economic Zone (EEZ)** extends to a distance of 200 nautical miles (370 km) out from its coastal baseline. The exception to this rule occurs when EEZ's would overlap; that is, state coastal baselines are less than 400 nautical miles apart. When an overlap occurs, it is up to the states to delineate the actual boundary. Generally, any point within an overlapping area defaults to the most proximate state.
